Orange City, Iowa 51041-0080

Method of Documentation of Acceptance: By brand and manufacturer's certification and **from a list of certified lots for use on Department projects (available to the Resident Engineer on the Materials Division's LAN site).**

1. The manufacturer shall furnish to the Resident Engineer and the Materials Division a certification for each lot certifying that the material supplied conforms to all the requirements specified and stating that the material is formulated the same as the material tested for QPL listing. This certification shall include formulation name, lot number, date of manufacture, lot quantity, purchaser, destination of shipment, quantity of shipment and formulation percentages.

A list of approved certified lots for use on Department projects is available to the Resident Engineer on the Materials Division's LAN site. Lots will not be added to this list if the lots are more than one year old and lots will be removed from the list when the lots become one year old.

2. The Contractor shall furnish to the Resident Engineer a copy of the above certification for each lot of paint used on a project at the time it is used.

3. Containers shall be clearly labeled with the manufacturer's name, formulation name, lot number, and date of manufacture on the top and side of the container.

Method of Approval for Materials to be added to this Qualified Products List:

Materials shall require the following applicable requirements.

1. Certified test reports from an independent testing laboratory showing that the pavement marking paint complies with the current requirements of AHTD Standard Specifications for Highway Construction Section 718.

2. Cold weather waterborne acrylic emulsion polymer paint does not have to meet the Raw Materials requirements of paragraph (d), Raw Materials for Vehicles (Waterborne), or subparagraphs (1) and (2) of paragraph (f) Physical Requirements of the Finished Pavement (Waterborne).

4. All certified test reports shall include the manufacturer's name, brand name of the paint, date of manufacture, and infrared spectra of the paint used in the tests. The spectra shall be of the total vehicle and vehicle solids.

5. The manufacturer shall provide a sample and product information, including printed instructions for application.

6. When deemed necessary by the Materials Engineer and at a frequency determined by same, samples of materials listed on the QPL will be taken and tested on a random basis. This testing will be done to affirm that the material is in conformance with the specification.
